## **AIM**

Migration is one of the defining features of the contemporary world of work and is integral to the process of social and economic development. The 2030 Agenda for Sustainable Development provides for a strong link between decent work and migration in Sustainable Development Goal 8 (SDG) of promoting 'sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all'. The huge potential contribution of labour migration to an inclusive development process can be fully harnessed only if there is a nuanced understanding of the emerging forms and nature of labour flows, on the one hand, and their impacts and implications at the micro and macro levels in the sending and receiving regions, on the other. This programme aims at developing the capacities of researchers and policy makers towards explicating the emerging issues in migration, especially in terms of research and policy concerns.
